SUMMARY REPORT ON WEB SECURITY GUEST LECTURE

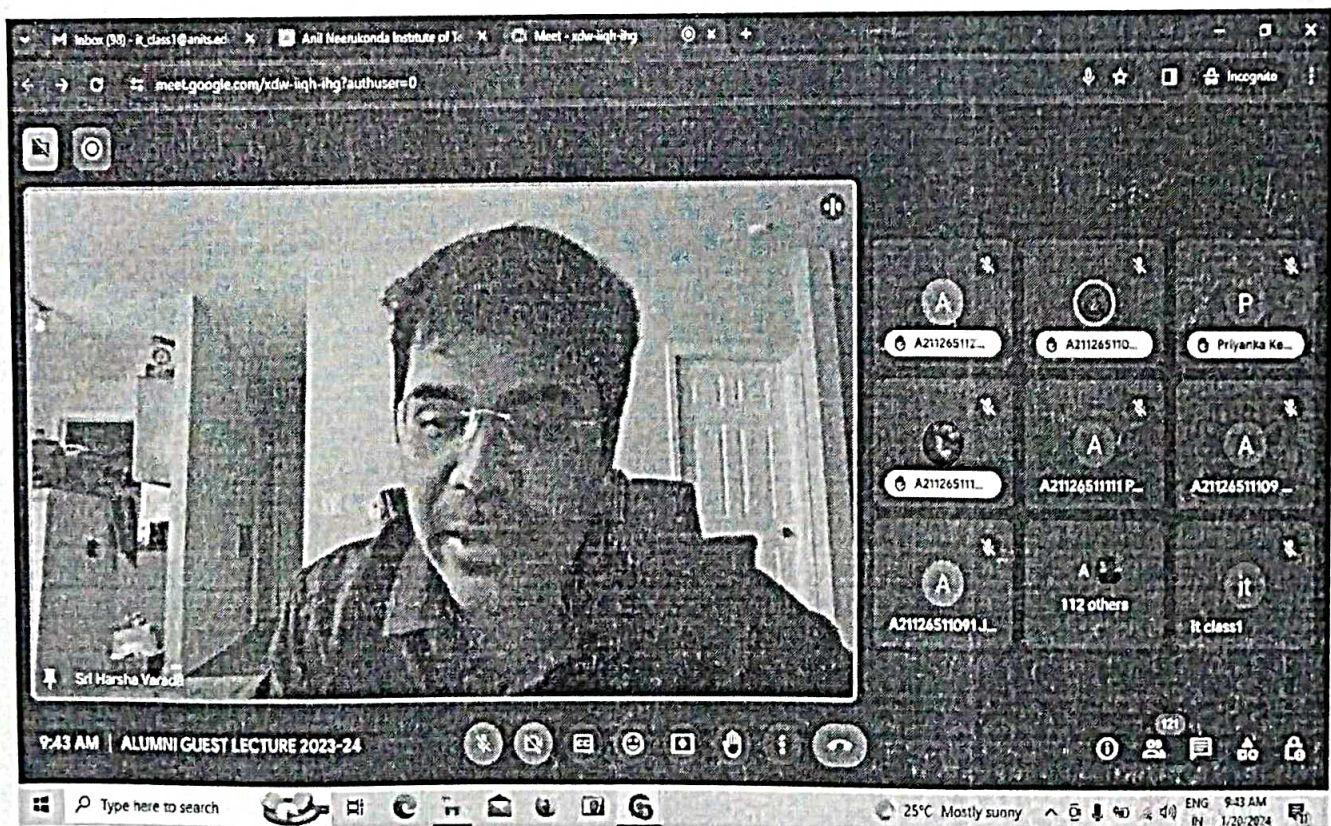

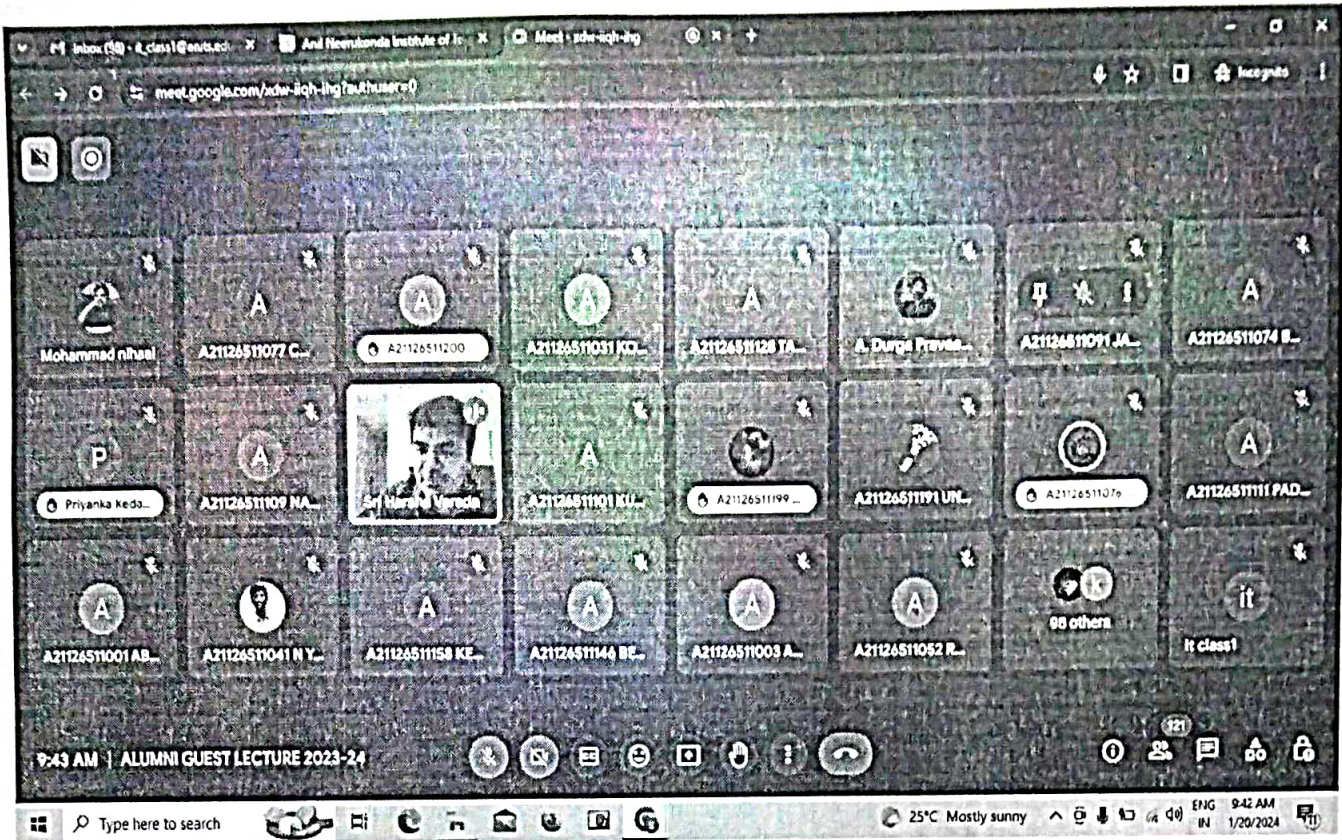

The department of Information Technology conducted Alumni Guest Lecture on “WEB SECURITY” by Sri Harsha Varada working as a Technical Architect in Infinite Computer Solutions, Maryland, USA for all Third year students. The basic objective of this webinar is about Introduction to Web Security, and also about OWASP. It is a community where it monitors different kinds of attacks. He also discussed about Top Picks of Web Security like different Attacks, Web Security Cookies and some Basics as well. He also explained about different cookies, also different users like Hackers, Ethical Hackers, Security Team, Security SPOC and Penetration Tests etc. He also mentioned about kinds of Web Security Tools. Total 125 students took part in this session and the Expert have clarified all the Queries which are raised by the students. Finally the session ended with the queries of the students and Vote of Thanks is given by Mrs.A.Surekha, Department Alumni Co-ordinator .

Sri Harsha Varada (Presenting)

9:49 AM | ALUMNI GUEST LECTURE 2023-24

Why not just pure statistical data?

The results in the data are primarily focused to what we can see for an immediate horizon. The focus is on the immediate horizon and they will tell you about what they find and hence they are not aware of the data. It is not like for people to develop testing methodologies for research and then use them for the data to be a parameter and run against a large problem of application. Computing an end of knowing how to in the past and might be thinking about the new way which is not broken at the end.

Therefore, we do not just go to the data but we think about the data because it is an important. The data has a program and it has to be used for the data.
