Department of Information Technology

<u>Summary Report</u>

On the 4th of September 2023, students in their third and fourth years of IT Department organized a badminton game exclusively for the faculty members. This event took place at the indoor badminton court, serving as a special celebration in honor of "Teacher's Day." It was a remarkable initiative to appreciate and acknowledge the dedication and hard work of our esteemed educators.

Continuing the spirit of appreciation and togetherness, on the 5th of September 2023, the students arranged a series of enjoyable and engaging fun games for the faculty members. These games were designed to foster a sense of unity and create memorable moments among the staff members. The active participation of all faculty members demonstrated their enthusiasm and willingness to engage with students outside the traditional classroom setting.

Furthermore, as a heartfelt gesture to express their gratitude, the students took the time to create handcrafted greeting cards. These cards served as tokens of appreciation, each carefully designed to convey the students' deep respect and admiration for their dedicated instructors. These handmade cards symbolized the collective sentiment of the student body, reflecting the profound impact the faculty members have had on their academic journeys. The students also presented the educators with gifts and also indoor plants as a token of appreciation. These actions showed how much we value our education and the strong connections we have with our teachers.
